

<p class="MsoNormal" style="line-height: 16.0pt; mso-line-height-rule: exactly; mso-pagination: none;">SAP Security is a highly complex framework for Enterprise Resource Planning (ERP). As one of the world's largest and most commonly deployed ERP systems, SAP has undergone considerable transformation over time to become a core part of many businesses' operations. Securing SAP requires more than a review of roles and profiles, it's a complex exercise that calls for real experts with in-depth knowledge.</p> <p style="box-sizing: border-box; margin: 0px 0px 14px; padding: 0px; font-size: 14px; direction: ltr; font-family: 'Helvetica Neue', Helvetica, Helvetica, Arial, sans-serif; line-height: 1.6; color: #222222;">Nullcode team have been conducting SAP Security Testing since R/3 was still current. We've watched SAP grow through ITS and NetWeaver into the modern platform it is today. Our consultants have extensive experience in SAP ABAP/4 and Java security, and are skilled in attacking across dialog, CPIC, and SAP's various web interfaces.</p> <h3 id="the-mandalorian-approach" style="box-sizing: border-box; margin: 14px 0px; padding: 0px; font-size: 18px; direction: ltr; font-family: 'Helvetica Neue', Helvetica, Helvetica, Arial, sans-serif; color: #222222; text-rendering: optimizeLegibility; line-height: 1.1;">Nullcode Scope</h3> <p style="box-sizing: border-box; margin: 0px 0px 14px; padding: 0px; font-size: 14px; direction: ltr; font-family: 'Helvetica Neue', Helvetica, Helvetica, Arial, sans-serif; line-height: 1.6; color: #222222;">Following an initial scoping meeting or call, we provide a fully scoped quote for your SAP Security Test. Depending on the maturity of your SAP solution this may take longer than scoping a normal penetration test, as considerable landscape detail is needed to scope accurately, and SAP deployments tend to have a large amount of stakeholder engagement that can sometimes (rightly) slow the process down.</p> <p style="box-sizing: border-box; margin: 0px 0px 14px; padding: 0px; font-size: 14px; direction: ltr; font-family: 'Helvetica Neue', Helvetica, Helvetica, Arial, sans-serif; line-height: 1.6; color: #222222;">Our consultants perform the work in accordance with the agreed scope. Once the test is complete, consultants produce a report with a high level executive summary, detailed technical section and appendices for any relevant observations requiring further detail.</p> <h3 id="typical-findings" style="box-sizing: border-box; margin: 14px 0px; padding: 0px; font-size: 18px; direction: ltr; font-family: 'Helvetica Neue', Helvetica, Helvetica, Arial, sans-serif; color: #222222; text-rendering: optimizeLegibility; line-height: 1.1;">Looking for</h3> <p style="box-sizing: border-box; margin: 0px 0px 14px; padding: 0px; font-size: 14px; direction: ltr; font-family: 'Helvetica Neue', Helvetica, Helvetica, Arial, sans-serif; line-height: 1.6; color: #222222;">Default accounts across clients
Insecure RFCs with weak authorizations
Portal access control weaknesses
Remote command execution
SAPGUI Debug support enabled in production
Insecure ABAP/Java calls in custom code
Insufficient authorizations
Privilege escalation vulnerabilities
Weak infrastructure controls
Transport integrity weaknesses</p> <p style="box-sizing: border-box; margin: 0px 0px 14px; padding: 0px; font-size: 14px; direction: ltr; font-family: 'Helvetica Neue', Helvetica, Helvetica, Arial, sans-serif; line-height: 1.6; color: #222222; text-align: center;"></p>
